ERP or Enterprise Resource Planning

- ▶ What is it
- ▶ How does it work
- ▶ Why is it important/ Benefits
- ▶ What makes us different/ Why us
- ▶ Our approach
- ▶ Our experience

What is ERP

Enterprise resource planning is a Business Process Management Software which provides a system of integrated applications to manage all facets of an operation and automate maximum back office functions related to technology, services and human resources.

How does it work

- ▶ The software automates and integrates the core business processes of the company such as taking customer orders, scheduling operations, keeping records of inventory and financial data etc.
- ▶ It embodies the products and processes, information flow, procedures and relationships between functions and activities
- ▶ This provides recommendations for what must be accomplished in order to meet the forecasted demand and maintain a smooth functioning of the business
- ▶ It creates an automated tracker useful for records, evaluations and follow ups

Why is it important/ Benefits

- ▶ Creates a central database with no duplication of data
- ▶ Protects the critical business data through well-defined roles and security access
- ▶ A well defined automated business process ensures compliance
- ▶ Reduces gaps and mismatches across various departments
- ▶ Facilitates effective cost and time management
- ▶ Updates status spontaneously
- ▶ Facilitates intensive planning with a higher level of accuracy
- ▶ Enables efficient resource management
- ▶ Translates the data into decision making information

What makes us different/ Why us

Our ERP Solutions are

- Created on an easy to understand user interface
- Remotely accessible
- Enabled with fully equipped data grids
- Color coded to demarcate priorities
- Uniform across the whole system, making them extremely user friendly
